

Philips SpeechExec
dictation software

Pro Dictate

SpeechExec

LFH4400

Optimize your workflow

with digital dictation and transcription

SpeechExec Pro Dictate provides you with a dictation management platform that unites voice recording, file routing, as well as speech recognition interfacing in one seamless solution. The dictation software provides you with easy-to-use functionality for organizing recordings clearly and transparently. Dictation files and documents can be automatically transferred via a company network, sent by email or uploaded onto an FTP server, depending on your requirements.

Professional operation

- Efficient handling of sound files and documents from dictation to archiving makes job retrieval simple and fast
- Job status information allows you to track work in progress
- The complete dictation process, speech recognition and document workflow is mapped within one simple application

Advanced functions

- Spoken instructions improve communication with the transcriptionist
- Automation of tasks boosts your efficiency and reduces document turnaround time
- Data protection allows only authorized persons to access your documents

Designed around you

- SpeechExec Pro and Philips Hardware encompass all possible dictation scenarios
- Short familiarization process thanks to the clearly structured user interface

PHILIPS
sense and simplicity

Highlights

One for all

Regardless of the user's tech skills, the SpeechExec Pro Suite and Philips digital dictation devices encompass all possible dictation scenarios. The easy-to-use and simple to set up solution, together with Philips dictation hardware make Philips the one-stop-shop for all dictation matters.

All for one

The complete dictation process, speech recognition and document workflow is mapped within one single application. All tasks are managed within the same framework so you do not have to leave the application for any dictation related task.

Hands-off policy

Automation of tasks lightens the file handling workload and boosts your efficiency. Automatic download of recordings, self-acting routing of jobs to network folders or speaking directly into predefined templates for instant document creation ease your daily tasks.

Looks familiar

The familiar application interface makes for a fast familiarization process with new SpeechExec Pro users, as well as for former tape based recorder users.

Safe & sound

Data protection (encryption and decryption) allows only authorized persons to access your documents. Thanks to the professional DSS Pro file format you can protect all dictation files with passwords, in order to avoid unauthorized access.

Intuitive user interface

The visual workflow management enables you to clearly organize your dictations. Efficient handling of sound files from dictation to archiving makes job retrieval simple and fast.

Seamless integration

The seamless integration of Philips dictation recording devices and the direct interface to Dragon NaturallySpeaking Professional speech-recognition software guarantee superb audio quality, high recognition accuracy and easy hardware administration.

Priority indexing

Priority indexing allows authors to easily define urgent jobs. Spoken instructions improve communication with the transcriptionist. Job status information and notifications Tracking work in progress is enhanced by the job status information feature. "Job started" and "Job finished" notifications ensure no time is wasted. Visible and audible job notifications eliminate errors and increase turnaround time.

Digital Speech Standard (DSS)

The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate, reduce file size, network traffic and required storage capacity. The format also allows additional information such as client/patient name and document type to be stored in the file header, further facilitating file organization.

Specifications

System requirements

- Processor: Intel Pentium 4, 1.0 GHz or equivalent processor
- RAM memory: 1 GB (2 GB recommended)
- Hard disk space: 100 MB hard-disk space for SpeechExec, 850 MB (32-bit) / 2 GB (64-bit) hard-disk space for Microsoft .NET Framework 4
- Operating system: Windows 7 (32/64-bit) / Vista (32/64-bit) / XP (32-bit)
- DirectX-compliant graphics card with hardware acceleration recommended
- Windows-compatible sound device
- Supported email programs: Microsoft Outlook Express 7, Windows Live Mail, Microsoft Outlook 2003/2007/2010 (32-bit), Microsoft Exchange Server 2003/2007/2010, Lotus Notes 6.0.3/6.5.5, Novell GroupWise
- Supported file servers: Windows 2003 Server (32-bit/64-bit), Windows 2008 R2 Server (64-bit)
- Supported speech recognition software: Dragon NaturallySpeaking 10.1/11 Professional or Legal Edition
- DVD-ROM drive

Package contents

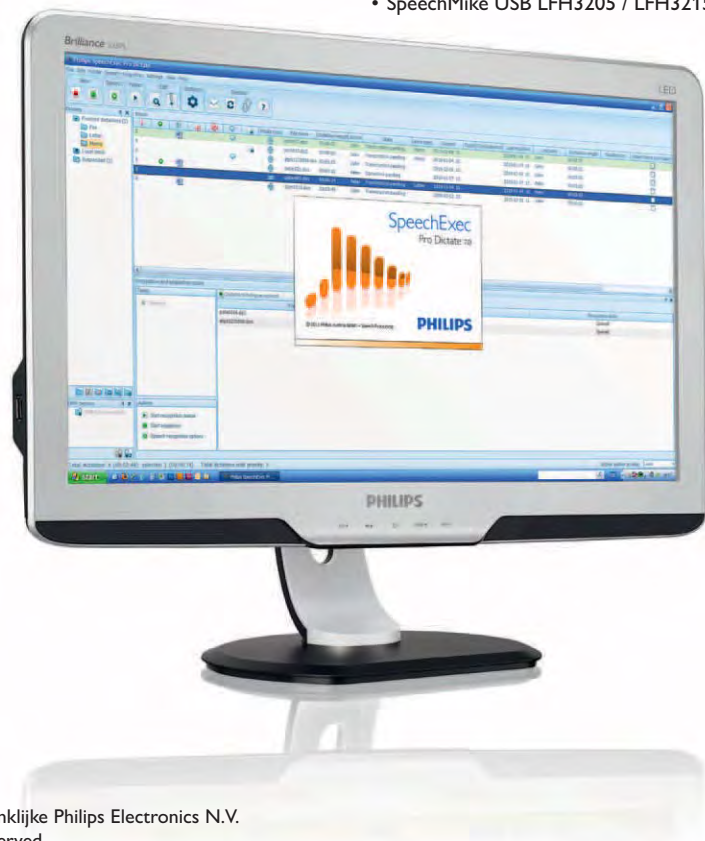

- SpeechExec Pro Dictate dictation software
- Quick start guide

Optional modules

- Speech recognition module for SpeechExec Pro Dictate LFH4410
